PROFILE

Pragmatic and forward-looking consultant and leader within IT, digital services and process development. Around 15 years of experience in IT, and more than 4 years in project work, consulting assignments and leadership support. Works at the intersection of business, management and technology, with a particular strength in creating structure, overview, shared understanding and practical digital solutions in complex environments.

Recent work has mainly been tied to Boliden Odda and GZO 4.0, covering digital services, IT and project control support, Power Platform, module development, RPA, modern collaboration solutions and support for introducing new ways of working. Uses AI to support product development, service design and solution development, and to translate business needs into requirements, implementation plans and usable digital services.

approx. 15 years

IT and digital services

4+ years

project, consulting and leadership support

CORE COMPETENCIES

Business process improvement	Project management	Analytical skills
Digital service development	Power Platform	Power Apps Canvas
Power Automate	RPA / Blue Prism	PIMS and Omega 365
Document management and quality	IT support and infrastructure	Training and onboarding

KEY ATTRIBUTES

- **Operational and flexible:** handles a high pace and changing needs, combining planning with execution.
- **Creates structure:** simplifies complex processes through clear documentation, automation and effective collaboration.
- **Cross-functional contributor:** takes responsibility for onboarding, support and collaboration across teams and disciplines.
- **Drives digital development:** develops and improves services, tools and ways of working based on actual business needs.

SELECTED PROJECTS AND SOLUTIONS

- Designed and partly developed an archive service for Vestland County Municipality, intended to reduce the workload for teaching staff and support archiving of about 20,000 files annually.
- Developed a Power Apps Canvas app for project management in the GZO project, with functions for information flow and onboarding of new employees. According to statistics, the app was used daily by one in three employees.
- Designed new modules for the GZO project in PIMS.
- Developed a Power Automate solution for time registration in the GZO project, with estimated time savings of about 12.5 hours per month.
- Develops internal solutions for the group, including a management system for information and collaboration, and a project execution platform supporting document management, inspections, quality and collaboration.
- Works on independent development projects within event administration, visualization, learning support and monitoring.
